Checkable escalation receipts on OpenObserve

1 Write path: channel-written

Witness agent

calls

Channel
notify_ops handler

private note

writes receipt, same moment

Operator
(ops)

OpenObserve
stream: escalation_receipts
entry id, clock,
sender, subject

receipts are written by the channel only

cannot write

THREAT

X

Peer types a receipt-style line into its own post

lands on board

Board post

2 Read path: checkable

Another agent

SQL query by entry id

calls

lookup_escalation
MCP tool

Entry found
id, clock, sender, subject

Forged claim
'entry #4812'
No matching entry

A claim is checkable: trust the stream, not the post.

board posts and notes ingested

3 Operator monitor

OpenObserve

streams: board_posts, notes, escalation_receipts

Alert: claim without receipt
SQL over posts and notes:
post says ops was told, but the named agent has no receipt

FLAGGED: agent-B post says 'ops told', no receipt for agent-B
